About Me

Web developer with **10+ years of experience** in building and managing web projects, with **main focus and experience in frontend development**.

Experience ranges from corporate/brand/product/communication projects to e-commerce and data driven projects.

Expertise includes **full life cycle project management**, from kickoff meeting with client, to technical specifications definitions, setup, coding, deployment and maintenance.

Proactive approach, eager to learn something new every day.

Strong believer in **personal continuous improvement** and **technical innovation**.

Tech Skills

- High level of proficiency with HTML5, CSS, JavaScript, responsive web design principles and patterns, pixel perfect layouts implementations, animations
- Frontend frameworks: UIkit, Tailwind CSS, Foundation, Bootstrap, Nuxt.js, Next.js
- CSS: Sass, BEM, ITCSS, Namespaces, Flexbox and Grid
- JavaScript: ES6+, GSAP animation library, Vue.js (Nuxt.js oriented), React (Next.js oriented), jQuery
- PHP (CMS oriented), Twig, Antlers
- Python, Django
- Strong experience in building web projects with CMS like Drupal, Statamic, CraftCMS, WordPress, SSG like Eleventy (11ty) or modern frameworks like Nuxt.js: from content structure to totally custom frontend development
- Tools: Git, gulp.js, rollup.js, Vagrant, Homestead, Lando
- UI Usability and technical SEO basic best practices
- OS: strong knowledge of Linux (Debian), MacOS
- Extensive experience in setup and management of linux-based servers (network services, LAMP stack, pm2)
- Deep understanding of Internet network infrastructure and services (IP, DNS, Web, Mail)

Soft Skills

- Critical and creative thinker, **proactive approach**
- **Team building,** positive and **leadership** attitude
- Love to manage and participate in **knowledge share** and **mentoring** sessions.
- Strong **organizational and time management skills**
- Ability to work independently or as part of a team
- Highly motivated and **committed in order to get things done providing the best value for the client**
- **Never stop learning** attitude
- Bass and piano player

| Professional experience

Lead developer / Trampoline Branding

JUN 2022 - ONGOING

- **Leading the developers group** inside a company of 30 people
- New technologies scouting, mentoring and team adoption planning
- Short and medium term **planning with production managers**
- Involved in internal and clients meeting as tech specialist
- **Managing relations** between dev team and other company teams: contribute to planning and **collaboration**
- Team members **support**
- Frontend developer

Web developer / Trampoline Branding

FEB 2021 - MAY 2022

- **Employed as frontend developer**, I built websites and landing pages in **full collaboration with UI/UX designers**
- Involved in **entire projects lifecycle**: client meeting, project analysis and technical requirements definitions, build and maintenance, support sessions for clients
- **Team support and mentoring:** I managed several technical knowledge share meetings
- **Built a custom Drupal starter theme**: components-based structure, modular CSS and Javascript, modern build tools (gulp/webpack/Lando): **reduced projects development time of 20%**, and **increased developer experience**
- **Introduced new technologies**: local development with Lando, Statamic CMS, 11ty

Web developer / EVO Studios

2015 - JAN 2021

- **Employed as lead developer**, I built websites, landing pages, e-commerce and applications in **full collaboration with the UI/UX Team** and being involved in **entire projects lifecycle**
- Regularly contributing to short and medium term **planning**
- Junior team members **support and coaching**
- **Built a custom WordPress starter theme** used by team for projects: based on MVC pattern, ACF, Twig template engine, modular Javascript and modern build tools (gulp/webpack)
- **Scouting and mentorship on new technologies** now used by team: Prestashop, Vue.js and Nuxt. js

Web developer / S4win s.r.l.

2012 - 2015

- Employed to build websites and e-commerce projects using mainly Drupal CMS
- **Promoted and implemented the complete replacement of the CMS** used by the company, from an old-fashioned java-based CMS to Drupal, **Reduced projects development time of 30% / 40%**, and increased clients satisfaction
